

NanoNotion Drives Organization-Wide Innovation

Powerful Capabilities

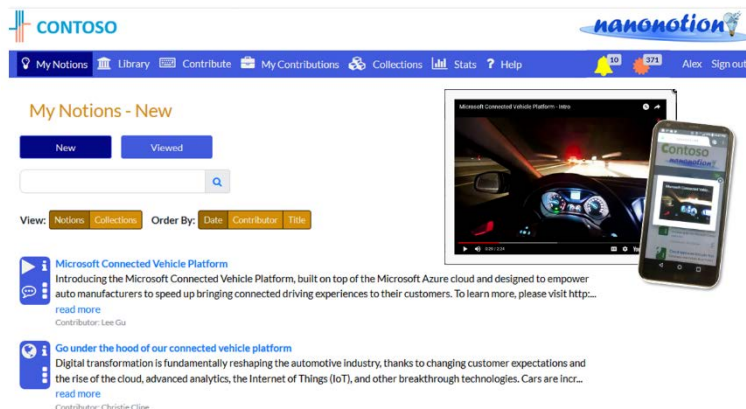

-  Surface and magnify valuable ideas and knowledge
-  Turn knowledge into valued products or services
-  Informal and social knowledge sharing and governance
-  Make use of internal crowdsourcing
-  Reward users for their contribution of informal knowledge
-  Capture and measure institutional knowledge
-  Share and exchange ideas
-  Validate reading of policies and procedures
-  Rapid employee onboarding
-  Curate collections of referenced materials

Leverage Microsoft Technologies and Applications

Microsoft
Azure

Certified

NanoNotion is a first of its kind, born in Azure SaaS application that integrates with Azure Active Directory, Azure SQL Database, and Office 365 Groups.

Enhance the Value of your Office 365 Investment

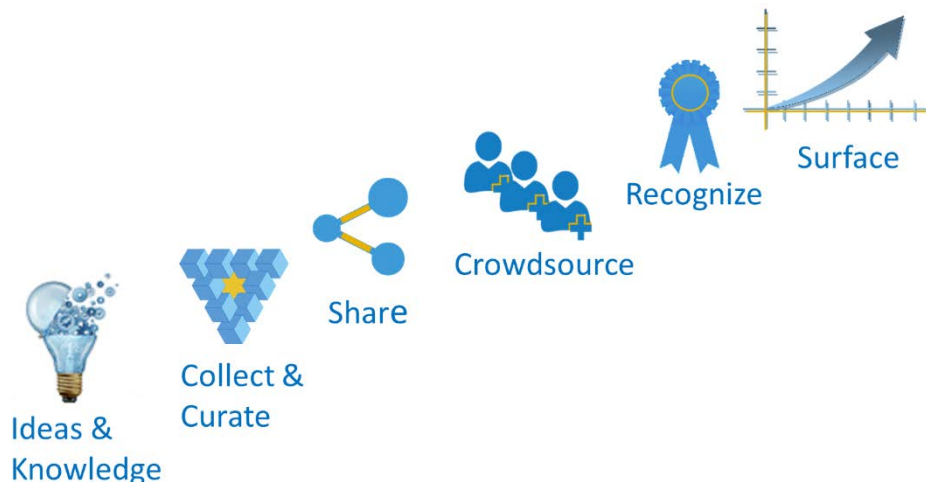

- ✓ Create Notions from Office 365 document types.
- ✓ Link to materials located on OneDrive and SharePoint.
- ✓ Socialize Notions with Microsoft Teams.
- ✓ Use Teams to help transform knowledge into products and services.

Uncover the Hidden Value in Azure

- ✓ Azure AD Federated single sign-on
- ✓ Azure SQL reports, data mining, machine learning
- ✓ Azure security and permissions
- ✓ Azure Groups
- ✓ Additional Azure Applications

NanoNotion Process

1. Create a Notion by associating a summary with reference materials.
2. The Notion is published to be shared and consumed.
3. Notion points accrue for the contributor, sharer, and consumer as the Notion is crowdsourced.
4. The Notion's visibility increases as it is shared and consumed throughout the organization.
5. The best ideas surface, creating feedback and value to users and the organization.
